Manifesto For a Successful Ukrainian Information War

“In war, truth is the first casualty”- Aeschylus

Foreword: This is a short manual to combat the pro-war propaganda currently going on against Ukraine. This book is dedicated to all the brave Ukrainians who died defending their country and for all the victims of this criminal invasion! Whether if they are alive or not. The blood of

the authors of this manifesto may not be Ukrainian. BUT THEIR HEARTS DEFINITELY ARE!

Index:

Chapter One: Why Was This Text Written and What Is It Useful For?

Chapter Two: Why Is This Project So Relevant?

Chapter Three: What Should the Pro-Ukrainian and Pro-Peace Organizations Do?

Chapter Four: The Websites Themselves and How to Use Them

Chapter Five: Conclusion

Legal Disclaimer: This manifesto was written for educational purposes only. You may not profit

off of it; but you may freely distribute and translate it as you please. This text also disavows political violence (Terrorism) and criminal activities.

Chapter One: Why Was This Text Written and What Is It Useful For?

This manifesto may be the most important thing its authors have ever written; but without your help it will be just another useless document lost in the internet. We could write a long book that would be hundreds of pages long, but that would be counterproductive to our objective which is to make it as simple and comprehensible to all kinds of people as possible. This is because this is meant to be a short practical guide and not a political, geopolitical or complicated textbook that only a few academics will be able to understand. We will only have achieved our objective if even people who barely know how to use social media or

technology at all understand the message of this text and its practical uses. Also, you may skip the introduction if you want to go straight to the services and tactics, we recommend to win this information war against Russian imperialism and its lackeys.

Some of the authors are not Ukrainian themselves, but you don’t need to be Ukrainian in order to support Ukraine! YOU ONLY NEED TO BE A DECENT PERSON AND A COMPASSIONATE HUMAN BEING! If you are Ukrainians by no means doubt that most of the world supports your just struggle and that we will help your righteous cause in any way we can. Sadly, we must specify that in our case it will be through peaceful and legal means; as if not pro-war stooges will claim this is a terrorist or racist short treatise. At least in our beautiful France, pro-war and pro-Putin groups tend to victimize themselves and pose themselves as rebels against the establishment WHEN IN REALITY THEY ARE BOOTLICKERS OF THE WORST KIND! AS THEY CHEER ON FOR THE MASS MURDER OF CIVILIANS CURRENTLY GOING ON IN

UKRAINE AND OPPOSE AMERICAN AND WESTERN IMPERIALISM WHILE CHEERING ON RUSSIAN IMPERIALISM LIKE IF IT WAS A SOCCER GAME! MOST OF THESE PEOPLE ARE JUST HOOLIGANS OR OUTCASTS; BUT DON'T DOUBT THAT THERE ARE SMART PEOPLE IN THE ENEMY CAMP WHO ARE DANGEROUS AS THEY MAY SOUND CONVINCING TO TEENAGERS OR THE AVERAGE YOUNG PEOPLE, ADULTS, WORKERS AND FARMERS!

We do not support cancelling pro-war and pro-Putin groups nor even censoring their social media accounts; as we believe that they have the human right to speak their minds even though they are even more toxic and harmful to society than Holocaust deniers, anti-vaccine movements, flat earther cults and similar movements. This is because human expression is a human write supposedly guaranteed by the "Universal Declaration of Human Rights" (Allow us to textually include its article 19: "Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media and regardless of frontiers"); even though many countries in the

world don’t respect it and treat it as right that is only valid on paper. To provide an example related to this manifesto we must specify that the Russian State did not start crushing on its opposition overnight as its proxy-war escalated into a full-scale invasion (The civil war in the Donbas started in 2014 because of far-right nationalists (National socialists (Nazis), monarchists/traditionalists and national Bolsheviks (Nazbols) included, far-left activists (Communists, anarchists, etc.) and Russian agents camouflaged as locals or volunteers; with even some libertarians volunteering for an “independent Donbas” that would eventually be annexed to the Russian Federation no matter what locals or the terrorists/guerilla members who fought for all these years actually desired!); as you have to keep in mind that Russia has never been a liberal democratic republic nor anything similar. Not today nor in the past. A country that is not free cannot possibly liberate another one! No matter how you may try to justify it or twist it around, it is just a fact. As a side note if you are pro-war and you’re a communist I must tell you that you’re an idiot literally supporting someone who is more similar to the Tsar Nicholas II of Russia than to any Soviet leader; as Lenin would be in prison

nowadays for opposing this inter-imperialist conflict and also Vladimir Putin is just a bourgeois nationalist surrounded by corrupt oligarchs!

We would not support banning pro-war accounts as long as they are real or legit and well; in the extremely unlikely case that Elon Musk and Mark Zuckerberg end up reading this manifesto we would like to ask them to BAN AND CENSOR pro-war bot accounts, the accounts of terrorists/separatists fighting and/or recruiting new members in Donetsk and Luhansk and for them to kindly remove literally every public/government account related to the Russian Federation from their platforms if they stand with the Ukrainian people. This is not because we agree nor sympathize with them; but because attacking them physically, arresting them or censoring them would be counterproductive as they could claim that “the system is persecuting them for saying the truth” (Even going as far as to use the famous quote of Voltaire known as “**I may not agree with what you have to say, but I will defend to the death your right to say it”)** and that “the truth defends by itself and not with any laws”; basically claiming that what they are

saying is right because they are censored for spreading their messages (Which is an extremely flawed logic as it would also make Holocaust deniers or “revisionists” and radical Islamists right if we applied that fallacious “logic”). Remember to not waste time arguing nor debating them online (Unless it is to make a video or post to debunk their lies, but don’t message them nor reply to their comments instead of just deleting their insults or propaganda from your accounts), as we have no time to lose crying online nor debating the enemy. Instead of doing that (Which is exactly what they want as they crave attention) we should wage and efficient, systematic and well-prepared information war against their lies and war propaganda! Do not waste your time online like the average teenager does on TikTok or Instagram; since this is not a game! Instead of doing that you should make one or several Twitter, Facebook, Instagram, Vimeo, TikTok and alternative social media accounts to repost all your pro-Ukrainian or pro-peace posts, videos, reels or blogs.

Also, we must say add that even though individuals are influential in human history; the relevant changes always come from militant organized

minorities and from the masses collectively joining for a common cause. This book is not a politically nor a religiously partisan book; in fact, the tips and services we will recommend are useful for anyone who is willing to use them… Even for our adversaries/enemies! As they are currently using them and winning the information war against Ukraine and its people on alternative social media platforms. You may ask yourself; what does it matter if weird internet websites host this propaganda? Well, the answer we will provide to that question is that those platforms are growing every day, provide economic incentives (Like cryptocurrencies or digital tokens) for people who use them, do not censor pretty much anything anyone uploads (In some like SteemIt, Hive and PocketNet nobody can even take down your own posts; NOT EVEN YOURSELF!) and can also be synchronized with mainstream social media platforms like YouTube to automatically reupload your videos in case they get censored (Most pro-war activists do this whether automatically or manually with websites such as Odysee/LBRY, BitChute, BitTube, Gab TV, Minds, etc.).

Before anyone claims otherwise; the authors of this manifesto are not paid for anyone nor any government to do so (As no government would like to support platforms that are harder to control and monitor such as these) and they will not get any profits, political favors nor anything but problems and probably death threats for doing so. But we decided to write this manifesto as we felt and feel that it is the right thing to do and even if it will only be a brick to

build peace, we must remember that walls can be eventually built with bricks and hard work! Even if this effort is only a grain of salt of what we should be doing to support Ukraine and its amazing, humble and lovely people; it will still be worth the effort if at least 100, 1,000 or 10,000 people read it, share it, download it and apply it. Also, before anyone claims otherwise; the authors of this manifesto oppose this war and every other war started in this century or the previous one. As wars are the most immoral and disgusting creation of humanity and we oppose all invaders; whether they are or were Russian, American, German, Japanese or from any other nationality. When we decided to right this book, we decided that we would not write it in the way a left-wing nor right-wing pamphlet, a Christian or Muslim scripture or a propagandistic work is written. As we do not care for who reads this or who you are, since as long as you are pro-Ukrainian or pro-peace you are in the same train as us and we wish that you may please join us in this journey by sharing this book with all your friends, influencers, television showmen or actors, any social media account which may be interested in helping our cause, by downloading and reposting this manifesto online and by showing it to as many people as you possibly can. Not to mention to actually use this manifesto for our holy war or “Great Patriotic War” and also to translate it to your own language for it to be available to more as many people on this planet as possible!

We know there may be grammar or spelling mistakes on this text; but the cause is too important to focus in the details when all that matters in this project is to spread the message. You may also be asking yourselves why we do not use the term “pro-Russian” that mainstream journalists and academics use? That is because we believe that Russia is way more than Vladimir Putin and his corrupt authoritarian clique; as we are not anti-Russian at all since, we all have Russian friends, some of us speak Russian, we all love Russian food, music, literature and history and we have nothing against the Russian people at all. We want to make that clear in order to shut the dirty propagandist’s mouths once and for all! In fact, Russians were the first ones to be conquered and oppressed by the sociopath known as Vladimir Putin. Sadly, most Russians (Who are not living outside their country) are pro-Putin and pro-war; but instead of hating Russians or promoting Russophobia because of that we acknowledge that that is only a product of the systematic brainwashing that the Russian people have been subjected to by schools, universities, military service, Russian TV channels and radio stations, newspapers, etc. The results of that mental remolding process in the Russian people and other nationalities was sadly so well performed that even family members decide to believe the Russian government on the Ukraine invasion (It’s not a “special military operation” and no war prevents the harming of civilians you monstrous idiots!) instead of believing their brothers, sisters, mothers or fathers; the same situation has happened and still happens with people

who have been friends for all their lifetime and ended their friendship for the same reason!

We must say that this manifesto was also written to help anti-war protestors in Russia to be safer; as we thank you for your courage and admire the bravery that you show for opposing the tyranny in your country and the brother war currently going on Ukraine. We know that you'll expose yourself to risks of all kinds (Even social ostracism); but we want to support you and tell you that there may be safer ways of doing that online… EVEN THOUGH PLEASE KEEP IN MIND THAT NOTHING DIGITAL IS IMPENETRABLE NOR FULLY SAFE! AS MAGIC DOES NOT EXIST! Please share this manifesto even if it goes against your own individualist and rationally selfish interests (Like providing for your family or having a promising future economically speaking), as the worst evils in history were not stopped because of people who decided to just look the other way instead of listening to their conscience and doing the correct thing. Authorities are not always invalid, but never forget than morality and the law are totally different things. As slavery and terrible events like genocides have been perfectly legal in the past. Also keep in mind that this manifesto is also useful for any other righteous cause in the world; so, if you want to use it to support the liberation of your country from a tyranny by all means do so. Although if you decide to use it for other purposes, we would like to ask you to at least support our righteous cause too as that is the main reason this

manifesto was written for. Please share this without thinking it twice so that if they persecute the authors of this book and project in any way, shape or form or even if they decided to get to the point of straight up killing us it will still have been absolutely worth it to have written this work; as it was for something infinitely greater than what we could ever be ourselves. We decided to take this risk for two main reasons; first because we believe the sovereignty and freedom of all peoples are priceless and second because we are truly pacifists opposed to all kinds of imperialists, although we acknowledge that to leave in peace a people must be armed and prepared for war in case an exploiting imperialist nation like Russia decided to invade them.

Keep in mind that not all pro-war activists nor Putin stooges are necessarily evil, they may be stupid or credulous enough to actually believe in what their saying or to believe that what these propagandists say is the only truth. But I am definitely sure that the people above the “influencers”/propagandists themselves who may be even giving them a salary are definitely evil, wicked and conscious of what their doing. As a clear example we would like to see that we do not believe the Russian people are necessarily evil for supporting this brother war, bloodshed and pointless conflict; as they have been programmed to do so under a dictatorial authoritarian system and have not been shown the other side of the story; which in our opinion is the only truth! The difference

between Russia and some parts of the rest of the world is that you can be pro-war in the west; but you can´t support peace nor Ukraine in Russia. If Russians want to liberate anyone they should look to their own country and conscience before criticizing anyone else’s.

This manifesto was made to WAGE WAR AGAINST WAR; but on a different front than in the battlefields, in international relations (By the way FREE THE LEOPARDS!) and in the one concerning humanitarian aid, foreign legions of brave volunteers dying for the Ukrainian people and donations to help the Ukrainian army persist in their brave struggle against Russian imperialism! We are sure that this text will piss off pro-war and pro-Putin activists and that the Russian government, Vladimir Putin and the intelligence services of many countries would definitely wish to prevent you from getting this information. So if you live in a country like Russia or Belarus and you are reading this; please download it and print it just in case you may someday lose access to this invaluable document. We would also like to thank META for inspiring us to write this text, as they decided to put their advertisers on Facebook and Instagram before the values of sovereignty, human rights, liberty/freedom and the right to access the free flow information. We say this as any post showing the truth of what is going on in Ukraine is marked as “sensitive content”, shadow banned by the algorithm in order for advertisers and the Russian government to be happy with these mainstream platforms and may even be marked as “hate speech” (Guess who defines what “hate speech” is here!) or “false information”; which literally means that these platforms prevent Ukrainians from recording what is actually going on in their country and sharing it with the rest of the world! **Also, Twitter decided to disable allowing Ukrainian phone numbers to verify accounts from their platform,**

effectively censoring or at least partially silencing the voices of the Ukrainian people defending their nation and of activists exposing what is truly behind this war in the first place and what is actually going on in Ukraine! In the websites provided here things like Alexei Navalny's "Putin's Palace" documentary or even the videos from the Azov Regiment can´t be censored by the Russian government nor anyone else! But keep in mind that although these platforms may be freer you are still bound to the legislation of your countries regarding what you may post, so please be aware of that and use them carefully, wisely and beware from the risks that your online activities may put you in. Use common sense and stay low-key and anonymous, that is our advice! The internet is currently the freest place on earth; although it is heavily monitored by all governments, different intelligence agencies, censored by mainstream social media platforms and search engines and as everything else in this world it is not perfect. But it's a useful tool in our hands that we should be using wisely instead of wasting our time with it!

Chapter Two: Why Is This Project So Relevant?

The Ukrainian war is the first war that has been fully transmitted through social media and online websites, which as you may imagine means that the cyber-war and information war currently going on online between pro-Ukrainian and pro-war voices has an invaluable and extremely relevant character to the outcome of the war itself and to the perception that the rest of the world has about it. This war does not

benefit Russians nor Ukrainians; as an old saying says that wars are only good for a few people (Like the weapons industry) and bad for most of the people (Including civilians and the soldiers fighting the war themselves). This information war is a struggle to win over the minds and hearts of the different nationalities, races and ethnicities across the world. As we know this is a struggle between good and evil! WE ARE IN THE RIGHT SIDE OF HISTORY! SO, WE NEED MORE ACTIONS AND LESS WORDS! WE MAY CRY OR COMPLAIN ABOUT EVERYTHING LATER… BUT BEFORE WE NEED TO REMEMBER THAN AN ACTION IS WORTH MORE THAN A THOUSAND WORDS!

The Kremlin is a criminal mastermind when it comes to propaganda, as we all know that they are experts in that art and know how to produce it and effectively distribute it. The pro-war side may have the money of rich and corrupt oligarchs, the support of the Russian government and other governments like the Chinese one, activists and "alternative news-sources" which are only bootlickers who do their dirty bidding for free and many other tools at their disposal… BUT WE HAVE GOD, THE UKRAINIAN PEOPLE, HUMANITARIAN AID (REMEMBER DONATE TO YOUR LOCAL UKRAINIAN HUMANITARIAN COMMITTEE; AFTER MAKING SURE IT IS LEGITIMATE OR EVEN OFFICIAL OF COURSE), THE INDESTRUCTIBLE (AS

UNBREAKABLE AS GRANITE!), BRAVE, VALIANT, COURAGEOUS AND ALTRUSTIC SUPPORT OF THE UKRAINIAN ARMED FORCES AND PEOPLE… AND ASIDE FROM THAT WE HAVE THE INTERNET; WHICH IS A TOOL WHICH WE MAY INTELLIGENTLY USE FOR FREE TO HELP OUR JUST CAUSE! LETS PROMOTE INTERNATIONALIST SOLIDARITY AND CIBER-BRIGADES IN THIS INFORMATION WAR (WE'LL SHOW HOW TO CREATE THEM LATER ON) TODAY, NOT TOMORROW! NOW GET SOME POPCORN AND LET THE SHOW BEGIN!

Chapter Three: What Should the Pro-Ukrainian and Pro-Peace Organizations Do?

We would like to encourage all the different Ukrainian communities across the world and all pro-Ukrainian committees and organizations to share this document and to use it themselves, as it was created for them to use it in the first place! In the same way that a child squeezes lemons in order to make lemonade, our enemies/adversaries will sadly surely use our creation for their own goals; but in the end that doesn´t matter as we know that most of the readers of this document will be supporters of peace and the Ukrainian people's right to exist as an independent and sovereign nation! All pro-Ukrainian accounts online should stay in the mainstream social media platforms and at the same time back up their content by spreading it in the platforms that this

document provides. Also for donations they should not only use PayPal, GoFundMe pages and Patreon accounts; but also cryptocurrencies such as Bitcoin (BTC) or if they want to be safer online and more anonymous they should consider receiving donations in cryptocurrencies like Zcash (ZEC), Monero (XMR) and Dash (DASH) to fund rallies, pro-Ukrainian activism online and in real life, Ukrainian cultural events, the Ukrainian army and of course the most crucial thing of all is to FUND INTITIATIVES RELATED TO HUMANITARIAN AID!

As previously mentioned, please download and share this document through as many places as you possibly can and to as many people as you may reach! Especially influential ones like celebrities, journalists or famous pro-Ukrainian activists online! This chapter will only be two pages long as we need to keep this manifesto short for as many people as possible to read it and share it with others. As it contains a very simple; but important message that will definitely be useful for our cause and to counter-balance "Russian"/pro-war disinformation and propagandistic lies online. This will definitely annoy the propagandists; as we will fill the websites they are using with actual truthful information.

At last, we should recommend to establish cyber-brigades based on the 1X5 or 1X10 principle. That would mean making a group on Signal or Telegram where videos would be shared for all the members to upload them at the same time and to later on like and share the posts in their own accounts; that is a tactic that is especially useful with influential accounts with hundreds or thousands of followers. Also, we must recommend to every pro-Ukrainian organization to make an account on LBRY/Odysee; as RT is currently there but it is a blockchain based social media platform that can automatically reupload videos from YouTube and was created by an American libertarian; which means it its

servers are hosted in the United States (US). Also upload the documents of your local pro-Ukrainian organizations there and specially content like Ukrainian nationalist music, books, texts and newsletters or videos from the Azov Regiment; as those are usually censored in the mainstream social media platforms but can be backed up there.

Chapter Four: The Websites Themselves and How to Use Them

THE TIME HAS FINALLY COME FOR THE MOST RELEVANT PART OF THE TEXT. WE WILL NOW PROVIDE YOU WITH THE WEBSITES WE'LL BE USING IN THIS INFORMATION WARFARE FOR UKRAINE IN ORDER TO CONTROL THE DISCOURSE AND COUNTER-BALANCE PRO-WAR PROPAGANDA. WE WILL SPECIFY WHICH PLATFORMS CAN BE AUTOMATICALLY SYNCHRONIZED WITH MAINSTREAM SOCIAL MEDIA PLATFORMS AND WHICH ONES YOU MAY USE AS FACEBOOK, TWITTER AND INSTAGRAM ALTERNATIVES. BUT FIRST WE MUST BEGIN WITH SERVICES TO BE A BIT SAFER ONLINE; EVEN THOUGH WE MUST STRESS THAT NOTHING ONLINE IS FULLY SAFE NOR TRULY "ANONYMOUS" AS EVEN THE SMARTEST HACKERS CAN END UP GETTING CAUGHT!

1-A SAFER WEB BROWSER:

Are you tired of cookies are be tracking you down, of YouTube advertisements and of dangerous pop-ups? Then Brave Browser is the perfect solution for all your online problems and is also safer than other alternatives like Firefox, Google Chrome or Opera (Which is partially owned/managed by the Chinese government even though they are supposedly a Norwegian company; SO, DON´T EVER USE IT!). Also even

though Gab Dissenter provides you with the awesome option to comment on websites that provide no comment sections or censor certain comments or in accounts, videos or posts in which the authors disabled the comment section; we must say that it is not fully safe. So, don´t use it either; even though it is based on the Brave Browser. Brave also provides you with access to an accessible and easy to use version of TOR (Which will change your IP address as you use it); which is useful to enter the deep-web (Although don´t dare to enter the dark-net please). That option will definitely be useful if you want to post “sensitive content” which may get you “cancelled” by pro-war activists or in certain countries even censored/silenced by political police. Also please explore the different alternatives for Virtual Private Networks (VPNs) that are out there; as they will also hide your IP address as you browse different websites online or if you decide to post anything. Remember that you can even combine the TOR option available on Brave Browser (As Brave Browser makes TOR a bit quicker and even safer) with a VPN in order to maximize your anonymity online. Also consider moving to the Linux version you may prefer and covering the camera of your computer or laptop (Just in case they monitor you); aside from disabling the microphones from the computers you may use for these tasks… This is especially important if you live in a country with political police and a nationally based intranet instead of access to the open world internet. We can’t legally advice you to release the information of certain important individuals in these platforms or to share secret government files on them if you ever gained access to them; as that would be illegal. But that is up for you to decide… But do so at your own responsibility.

2-Some Safer Search Engine Alternatives:

If you are looking up websites that are banned in your country or which may get you in trouble, please don't be dumb enough to use Google, Yandex, Yahoo Search or Microsoft Bing; as they are not safe and usually collaborate with governments. Please use Startpage as it is the safest search engine that we know of and if you desire not to use that one, please consider using DuckDuckGo; which has some flaws but it is still safer than the ones we HIGHLY ADVICE NOT TO USE FOR THESE PURPOSES AND IN GENERAL.

3-Safer Electronic Mailing (Email) Alternatives:

As you may imagine neither Microsoft Outlook, nor Google with its Gmail, Zoho, Yandex, AOL Mail nor other services like Yahoo are surveilled, encrypted nor safe for these purposes... We will recommend only two services here to make this text concise; Proton Mail (Which is only safer and encrypted when used to message other Proton Mail email addressed) and Tutanota. Although of course there are other alternatives too; we do not wish to extend on this matter more than what we consider it necessary to do so. Some of these platforms have applications you may also wish to download if that is more comfortable for you to actually use them. Remember to share your websites and accounts here in your Instagram, Twitter or Facebook biographies or in the sections where you may add links to your accounts as that will make people actually watch and interact with them!

4-Alternative Social Media Platforms That May Be Automatically Synchronized With YouTube and Twitter:

In this little subchapter we should mention something extremely important for YouTubers and Twitter users; there are websites that can automatically back up your content into places where they will it will definitely not get censored nor ever taken down. This is specially important for influential YouTube channels and Twitter accounts and the funniest part of all is that you do not need to use anything like IFTTT (Which we still recommend you to use in order to spread your content through different mainstream social media platforms quickly) as the websites themselves will do this for you. LBRY/Odysee, BitChute, Rumble and Minds will automatically back up your YouTube videos (BitTube used to have that same option; although we are not sure if it does anymore as it didn't work properly when one of the authors tried it); it is ideal for you to promote your other accounts (For your followers to be able to access them in case your main accounts get taken down) and also we advise you to upload content that will be particularly "sensitive"/censored to those websites manually… As a side note DLive and FLOTE are good livestreaming alternatives; but remember to share the links of your livestreams to your followers if you use them. This is in case you are in a country where livestreaming anti-war content or protests on YouTube, Facebook, Instagram or Twitter is just not an option or a smart idea. Also please make Gab bots to back up your Tweets into that social media platform and if you want synchronize your FLOTE with your Twitter (As it will post anything you post on FLOTE into your Twitter account as well).

5-YouTube, TikTok and Vimeo Alternatives:

YouTube, TikTok and Vimeo censor or shadow ban “sensitive” or “extremist” content in order to make sure that their advertisers are happy. So, we want to recommend you to download as many pro-Ukrainian videos (Whether short or long), documentaries and specially content from organizations like the Azov Regiment and to massively upload them to these websites… The websites we want you to use are LBRY/Odysee, BitChute, Gab TV, Brighteon, BitTube and FLOTE; but keep in mind that the first two we mentioned are the most crucial ones as they have millions of users (One is a peer-to-peer video hosting service and the other is based on its own blockchain and rewards you with its own token) and are growing every day. This is specially important as RT videos and similar content are being massively uploaded to those sites every day and even if only a few thousand pro-Ukrainian activists started doing the same thing it would definitely change things in this modern information warfare “game”; even if only by a little. Also, if you have a really slow internet then BitTube is your best option to go to; as it uploads videos in an incredibly rapid manner. As a final note to finalize please use your LBRY and Minds tokens for either humanitarian aid and/or for promoting your own or other pro-Ukrainian content as we will do with our LBRY/Odysee account as well; also remember that LBRY/Odysee allows you to repost videos or documents to your channel or different channels (You can have different channels in the same account) so if you’re reading this document there please repost it to all the channels you may own and then download it and re-upload them to all of them as well. THAT MAY HOPEFULLY MAKE THIS DOCUMENT VIRAL!

6-Twitter, Instagram and Facebook Alternatives:

Twitter, Instagram and Facebook constantly shadowban content and even automatically censor it on some occasions (Or you may get silenced if pro-war accounts and/or bots mass-report you). Please re-upload the same content that you upload to these websites to Minds, Gab, FLOTE, PocketNet and Parler. Specially “sensitive” images or videos you may want the whole world to see; for example raw footage or pictures of the tragic results of Russian bombings! Same goes for doxing (Releasing the information of pro-war activists or governments) and similar activities… Although we must repeat that we do not advocate for such a thing; not because it would be “immoral” but because it is illegal to do so…

7-Reddit and WordPress Alternatives:

Forums like Reddit and blog making services WordPress or Google Sites censor or shadowban pro-Ukrainian content. We want to recommend you all to use SteemIt and Hive (Specially in the active Ukrainian already communities already present there but also outside them), Medium, PocketNet (It has an option for writing blogs and soon it may have one for documents too) and FLOTE (You may back up your posts there and also, they may have a file sharing option soon). USE SUBSTACK TOO!

THAT IS ALL WE HAVE TO SAY ABOUT THE WEBSITES WE RECOMMEND YOU TO USE; IF YOU KNOW OTHER ALTERNATIVES FEEL FREE TO ADD THEM TO THE MANIFESTO AS YOU TRANSLATE THE DOCUMENT.

USING THE GOOD OLD “DIVIDE AND CONQUER” PRINCIPLE WE NOT ONLY MAKE OUR ACTIVITIES ONLINE SAFER (DIVIDING THE PRO-WAR INTELLIGENCE AGENCIES); BUT ALSO DIVIDE OUR CONTENT SO THAT WE WILL FLOOD ALTERNATIVE PLATFORMS CURRENTLY FULL OF PRO-

WAR VOICES WITH THE TRUTH AND PREVENT ANYONE FROM CENSORING OUR VITAL, CRUCIAL AND IMPORTANT MESSAGE!

Chapter Five: Conclusion

As a short conclusion we want to say that the Truth For Ukraine Project was an idea that was neither developed for profits, fame (As the authors have to remain anonymous for obvious reason) nor in cooperation with any non-governmental organizations (NGOs) nor states. The only way in which this document will become useless is if our adversary/enemy could fully shut down the internet worldwide; which will not happen any time soon! As we already said… WAGE WAR AGAINST WAR! PEACE AND LOVE ARE STRONGER THAN WAR AND HATRED! We did this with no other intention than to oppose this fratricidal, **vicious**, criminal, unjustifiable, gory and bloody invasion in any way close to our hands!

This will definitely not change the outcome of the war in the short-term; but if enough people use the information provided here it will counter-balance the pro-war propaganda and lies that are currently being pushed by the Kremlin and its lackeys! WITH ALL OUR HEARTS WE WANT THIS BLOODSHED TO END AND FOR THIS DOCUMENT TO BE USEFUL FOR THAT CAUSE. ENTER THE ENEMY BATTLEFIELDS IN UN-EXPLORED TERRITORIES IN THIS NEW FRONT OF THE INFORMATION WAR… MAKE PRO-UKRAINIAN GROUPS ON THESE WEBSITES TOO AND USE TELEGRAM CHANNELS TO PROMOTE THIS MANIFESTO! ENTER THE ENEMY BATTLEFIELDS IN UN-EXPLORED TERRITORIES IN THIS NEW FRONT OF THE INFORMATION WAR… WE MAY COME BACK AS THIS MAY NOT BE OUR LAST PROJECT RELATED TO OUR JUST CAUSE!
